## Situation Summary

Albania faces elevated political and social tension driven by sustained anti-government and environmental protests centered on a high-profile luxury resort project linked to U.S. political figures. Mass demonstrations in Tirana and coastal zones have persisted for approximately ten consecutive days, with police and private security actively managing crowds and restricting access to disputed development areas. The concurrent launch of a major anti-corruption investigation by SPAK into the project, combined with EU concern and unverified claims of Iranian information operations, has created a complex security environment marked by unpredictable protest timing, heightened law enforcement presence, and potential for confrontations between demonstrators and security personnel.

## Key Developments

- Tirana, 12 June 2026 - Large anti-corruption demonstrations continued in central Tirana with heavy police and security deployments around government buildings; thousands gathered to protest alleged misuse of public funds and lack of transparency, with crowd-control activity ongoing around state institutions.
- Tirana, 12 June 2026 - Daily "Flamingo Revolution" rallies persisted outside Prime Minister Edi Rama's office in the government district, with thousands participating in sustained protests against the Narta/Sazan resort project; demonstrations described as continuing through the week with sustained political tension.

- Narta Lagoon / Zvernec, Vlore County, 11-12 June 2026 - Environmental protesters maintained presence near construction zone; social media video documented a private security guard forcibly removing an activist, an incident amplified online and likely to fuel further confrontations between demonstrators and security actors.
- National, 11-12 June 2026 - SPAK (anti-corruption prosecution) escalated investigation into alleged property fraud tied to the resort project, freezing associated company bank accounts and revoking private security firm licenses; development work reportedly halted or severely constrained.
- National, 11-12 June 2026 - EU officials conveyed formal concern to Albanian government regarding environmental and rule-of-law issues surrounding the resort project; messaging amplified on social platforms and likely to intensify political pressure on the Rama administration.
- National cyber domain, 11-12 June 2026 - Prime Minister Edi Rama publicly attributed amplification of protest mobilization to ongoing Iranian cyber operations against Albania, signaling potential for heightened digital surveillance and monitoring of online platforms and media outlets.

## Highest-Risk Areas

Elbasan County (risk score 31.9) and Vlore County (risk score 22.8) drive the national threat ranking, with Vlore's elevated risk directly attributable to the coastal resort project and sustained environmental protests in and around the Narta Lagoon construction zone. Tirana County (8.7) reflects capital-city concentration of anti-government demonstrations, government-district policing, and institutional security activity. The remaining counties register baseline risk (1.9-7.3) with no current event signals; however, Tirana's status as the political center means that developments in the capital can rapidly trigger secondary effects on transport, services, and business-district operations.

## How GeoBit Would Assist

Security teams should deploy AOI Monitoring & Early Warning on central Tirana (government quarter, PM's office) and the Narta Lagoon/Zvernec area to detect protest timing and crowd size in near-real time. Network & Actor Analysis of protest organizers, SPAK prosecutors, private security operators, and EU diplomatic channels will clarify decision-making and escalation vectors. Sentiment & Temporal Analysis of social media (X, Telegram, local platforms) will forecast momentum, grievances, and potential flashpoints; Routing & Network Analysis will support alternative transport planning for personnel or assets in high-protest zones.

## 7-Day Outlook

Demonstrations are expected to continue through mid-to-late June, sustained by the SPAK investigation, EU pressure, and environmental activism around the resort. Police and private security deployments will remain elevated, with periodic crowd-control operations and possible temporary access restrictions in Tirana and coastal development zones. The risk of isolated confrontations between demonstrators and security personnel remains moderate; large-scale violence is not currently assessed as probable, but spontaneous gathering and traffic disruption should be anticipated in the capital and Vlore County.

## Highest-Risk Areas - Ranked

#State / Region Risk  
 1 Elbasan County 31.9  
 2 Vlore County 22.8  
 3 Tirana County 8.7  
 4 Fier County 7.35  
 5 Durrës County 1.96  
 6 Shkoder County 1.97  
 7 Kukes County 1.98  
 8 Lezhe County 1.99  
 9 Diber County 1.910  
 10 Berat County 1.911  
 11 Korçë County 1.912  
 12 Gjirokastër County 1.9
