Cyber & Internet Disruption

Layer-7 DDoS attack intensity (0-100, normalized) & internet outages over the last 28 days - Source: Cloudflare Radar.

Situation Summary

Kenya's composite threat score remains moderate (rank #28 globally, score 65), with civil unrest as the primary driver. Over the past 48 hours, security incidents have diversified across aviation disruption, targeted violence near the Somalia border, trader protests in Nairobi, political-rally disruptions, and organised-crime operations, signalling a fragmented but elevated threat environment. The convergence of labour action, customs-related civil unrest, and border-zone criminality suggests no single dominant crisis, but multiple concurrent operational and travel-security risks requiring sector-specific attention.

Key Developments

- Jomo Kenyatta International Airport (JKIA), Nairobi; Moi International Airport, Mombasa; 30-31 Aug 2026: Kenya Aviation Workers Union (KAWU) resumed industrial action, causing severe flight delays (2-6+ hours), cancellations, and overnight passenger stranding across the airport network. Domestic and regional routes are severely disrupted; travellers report sleeping in terminals.
- Damasa Shopping Centre, Lafey Sub-County, Mandera County (Kenya-Somalia border); 29 Aug 2026, 05:10 local: A middle-aged man (Mohamud Mohamed Ali, aka Maalin Guliye) was shot dead by unknown assailants near a mosque. Attackers reportedly fled toward Damasa, Somalia. Multi-agency investigation ongoing; elevated cross-border insecurity and targeted-killing risk confirmed.
- Nairobi CBD and commercial districts; 28-29 Aug 2026: Small-scale traders protested Kenya Revenue Authority customs-valuation benchmark increases, with businesses closing across Gikomba, Nyamakima, and Eastleigh markets. Police deployed tear gas on Moi Avenue, Kenyatta Avenue, and near Parliament

Buildings to prevent marches toward KRA headquarters and Parliament. Traders threaten renewed action.

- Meru Town, Makutano area; 30 Aug 2026: A Linda Mwananchi political rally was briefly disrupted when a teargas canister was deployed into the crowd, causing panic and dispersal. Indicates heightened risk of sudden police or actor-initiated crowd-control measures at opposition-linked events.

- Homa Bay Town; 29 Aug 2026 (reported 31 Aug): Detectives raided a rental house and arrested two suspects in connection with a mid-August robbery-with-violence attack on Homa Bay Tourist Hotel. Suspects are scheduled for court appearance on 31 Aug; reflects ongoing organised violence risk around commercial and political sites.

- Munyu Road, Nairobi CBD/Embakasi; 31 Aug 2026: Intelligence-led undercover operation by Embakasi and Central Police Stations targeted a shop suspected of trading stolen mobile phones, resulting in at least one arrest. Investigation ongoing; indicates active organised-crime networks in central Nairobi.

- Kyanja Heights, Nakawa, Nairobi; 30 Aug 2026: Kenya Directorate of Criminal Investigations arrested a police constable (Bett Kiplangat Collins) and a civilian (Pius Muiru Mbugua) in connection with an unspecified investigation, suggesting internal-security or corruption concerns within law enforcement.

Highest-Risk Areas

Sub-national risk-ranking data is unavailable in current reporting. However, spatial clustering of incidents points to elevated risk in Nairobi CBD and commercial zones (civil unrest, organised crime, political gatherings), Mandera County border areas (targeted violence, cross-border banditry-evidenced by the 29 Aug killing and 29 Aug livestock theft in Mlima Arimoroti), and coastal and western counties hosting tourism and political activity (Mombasa airport disruption, Homa Bay organised violence, Meru political rally disruption). Border regions remain most acute due to Somalia-linked insecurity.

How GeoBit Would Assist

Security teams managing Kenya operations should deploy AOI Monitoring & Early Warning on Nairobi CBD, Mandera border districts, and airport hubs to detect protest escalation, labour action, and cross-border incidents in real time. OSINT fusion and entity extraction on trader unions, aviation-worker groups, and political movements would enable predictive early warning of further strikes or demonstrations. Routing & Network Analysis capabilities are critical for duty-of-care teams to identify alternative transport and airport-transit routes as aviation disruption persists and border risk evolves.

7-Day Outlook

Aviation strikes are likely to persist through early September absent rapid labour negotiation; passengers should expect continued flight delays and cancellations. Trader protests may resume if customs-policy concessions are not announced, with tear-gas risk in Nairobi CBD. Mandera border insecurity is expected to remain elevated given the targeted killing and livestock theft; security patrols and cross-border tensions may intensify over the coming week.
