Layer-7 DDoS attack intensity (0-100, normalized) & internet outages over the last 28 days - Source: Cloudflare Radar.

Situation Summary

Sudan remains in active multi-front conflict with composite threat score 98 (rank #2 globally), driven by sustained fighting between the Sudanese Armed Forces (SAF) and Rapid Support Forces (RSF) across Kordofan, Darfur, and Blue Nile State. Late August saw intensified combat operations including cross-border drone strikes, mass-casualty raids on civilians, and significant displacement in border regions. The security environment is deteriorating rapidly with no sign of de-escalation and humanitarian conditions collapsing in displacement camps and urban centers.

Key Developments

- Blue Nile State (Kurmuk/Geisan axis), 29-30 August 2026: RSF and SPLM-N forces claimed seizure of Sirkam and Bakori army bases following intense fighting; SAF reported shooting down a "hostile strategic drone" from Ethiopia. Nearly 20,000 civilians displaced from Blue Nile in two days following the base seizures and coordinated attacks.
- North Kordofan, Sharu area (north of Sodari), 29-30 August 2026: Two confirmed drone strikes killed at least 8 civilians and wounded dozens in populated areas, linked to ongoing SAF-RSF operations and demonstrating use of aerial weapons against civilian concentrations.
- North Kordofan, villages west of Bara (Al-Qaa and Al-Kawakiti), 29-30 August 2026: RSF-linked fighters killed 5 civilians in coordinated attacks on rural communities, per Sudan Doctors Network reporting dated 31 August.
- El Obeid and surrounding camps, North Kordofan (reported 31 August 2026): Humanitarian conditions

described as "dire and deteriorating" with ongoing arrival of displaced persons from active combat zones and constrained access to aid.

- North Darfur and East Darfur displacement camps, 28 August 2026: Camp fires destroyed emergency shelter infrastructure; 5,450 tents distributed in response, indicating rapid deterioration of IDP conditions across Darfur.

- RSF force composition shift (31 August 2026): Approximately 200 RSF fighters and equipment defected to SAF under intelligence commander; potential indicator of internal RSF instability and risk of localised retaliatory actions.

- Cross-border drone activity, Kurmuk area (Blue Nile State), 27-28 August 2026: Sudan military reported interception of three hostile drones alleged to originate from Ethiopia on 27 August, with continuation of air-defense operations on 28 August, signaling escalated regional tensions.

Highest-Risk Areas

Blue Nile State (especially Kurmuk/Geisan/Sirkam axes) and North Kordofan (including Sodari, Sharu, Bara, and El Obeid) present the highest acute risk due to active combat, drone strikes, mass-casualty civilian attacks, and rapid displacement. South Kordofan (Otoro tribal areas) shows elevated communal violence risk linked to SPLM-N operations. Darfur displacement camps face compounding humanitarian collapse and fire/disease risk. Cross-border areas (Sudan-Ethiopia-Chad tri-border near Wadi Hawr) remain contested with reported airstrikes and SAF-RSF engagements.

How GeoBit Would Assist

Real-time AOI Monitoring & Early Warning with persistent watch on Blue Nile, North Kordofan, and Darfur camps would enable duty-of-care teams to detect displacement surges and combat-zone expansion within 12-24 hours. Satellite & Imagery Analysis combined with Intel Sweep and X/Twitter OSINT would corroborate force movements and drone activity near personnel or asset locations. Routing & Network Analysis would identify alternative overland corridors and safe transit windows as primary routes become contaminated by active fighting.

7-Day Outlook

Sustained multi-front SAF-RSF combat operations are expected to continue with further displacement surges, particularly if Blue Nile fighting spreads. Cross-border drone activity and alleged Ethiopian involvement risk wider regional escalation. Humanitarian collapse in Darfur camps and El Obeid will likely intensify pressure on aid operations and increase secondary security risks (disease, civil unrest, crime).
